

This page provides an abstract, justification, and target dates for a potential rule that the U.S. Nuclear Regulatory Commission (NRC) has prioritized in its Common Prioritization of Rulemaking listing.

Please visit the [Rulemaking Priorities](#) page on the NRC's public Web site for additional information about this page and to view the entire Common Prioritization of Rulemaking listing.

<b>2017 Edition of the American Society of Mechanical Engineers Boiler and Pressure Vessel Code (Rev. 2)</b>				
<b>Abstract</b>				
<p>This rule would amend the Nuclear Regulatory Commission's regulations to incorporate by reference the 2017 American Society of Mechanical Engineers (ASME) Boiler and Pressure Vessel Code. This is a non-discretionary rule directed by SECY-10-0016. The Nuclear Regulatory Commission has a well-established practice of approving and/or mandating the use of certain parts of editions and addenda of ASME Codes in 10 CFR 50.55a through the rulemaking process of incorporation by reference. This practice assures consistency across the industry and that the Nuclear Regulatory Commission will continue to support the use of the most updated and technically sound techniques developed by the ASME to provide adequate protection to the public. This rulemaking also enhances the efficiency and effectiveness of Nuclear Regulatory Commission regulations by making use of current voluntary consensus standards and is consistent with applicable requirements of the National Technology Transfer and Advancement Act.</p>				
<b>Justification</b>				
<p>The rule scores 33 points (10, 10, 10, 3) because of the following reasons: A) Moderate contributor to the safety goal (strategy 1); B) Significant contributor to the regulatory effectiveness goal (strategies 1 and 2); C) Commission direction in SECY-10-0016 and implements applicable requirements of the National Technology Transfer and Advancement Act; and D) Moderate stakeholder interest.</p>
