

This page provides an abstract, justification, and target dates for a potential rule that the U.S. Nuclear Regulatory Commission (NRC) has prioritized in its Common Prioritization of Rulemaking listing.

Please visit the [Rulemaking Priorities](#) page on the NRC's public Web site for additional information about this page and to view the entire Common Prioritization of Rulemaking listing.

<b>Dose Assessments for Radioactive Effluents (Rev. 2)</b>				
<b>Abstract</b>				
This rule would better align the Nuclear Regulatory Commission regulations governing dose assessments for radioactive effluents from nuclear power plant operations with the most recent terminology and dose-related methodology published by the International Commission on Radiological Protection (ICRP) contained in ICRP Publication 103 (2007).				
<b>Justification</b>				
This rule scores 30 points (15, 10, 3, 2) because of the following reasons: A) Moderate contributor toward one or more goals and implements multiple strategies in one or more goals (safety strategies 2 and 3; security strategies 1 and 3); B) Significant contributor toward one or more strategy (regulatory effectiveness strategies 1, 2, and 3; openness strategy 3); C) Moderate contributor toward one or more considerations. Supports a Nuclear Regulatory Commission licensing initiative with a future regulatory benefit and has Commission direction to proceed – SRM SECY-12-0064; and D) Moderate public interest and participation.
