Subject: Request for Revision to 2015 Report of Exempt Distribution; Teledyne API; License No. 04-23983-01E
Attachments: RIS 2014-10 Exempt Distribution.pdf

Dear Mr. Hunt,

I've reviewed your exempt distribution report dated January 4, 2016.

In your report, you indicated that your Model 602 devices contain "no more than 100 microcuries (3.7 MBq)." Please note that you are required to report on the products and radioactivity that you have actually transferred and not on what you are authorized to transfer; therefore, your report should reference the amount of radioactivity transferred rather than the amount you are authorized to transfer. Also, you have not reported the total quantity of C-14 that was distributed in your Model 602 devices. With these issues in mind, please revise and resubmit your report to indicate, as required by 10 CFR 32.29(c)(3)(ii), for each radionuclide in each type of product and each model number, the total quantity of the radionuclide. Further information about the requirements that apply to annual reports of exempt distribution can be found in the attached Regulatory Issue Summary.

A hard copy of your revised report should be addressed and sent to:

ATTN: Document Control Desk/Exempt Distribution
Director, Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Please be aware that upon your request, proprietary information submitted to the NRC may be withheld from public disclosure. To do this, you must follow the procedures in 10 CFR 2.390(b) including requesting withholding at the time the information is submitted and complying with the document marking and affidavit requirements set forth in 10 CFR 2.390 (b)(1).

If you have any questions, please feel free to contact me.

Regards,
Eric
