Subject: Request for Revision to Report of 2015 Exempt Transfers by STEP Analytics USA; License No. 19-23974-01E
Attachments: RIS 2014-10 Exempt Distribution.pdf

Dear Mr. Meinholtz,

I've reviewed your exempt distribution report dated January 4, 2016.

You have stated the maximum allowed radioactivity per device. Please note that the reporting requirements pertain to the radioactivity that is actually distributed and not what is authorized. Also, you have provided the number of units transferred and the activity per device, but please note that additionally, you are required to provide, for each model number, the total quantity of the radionuclide that has been transferred. With this information in mind, please revise and resubmit your report to indicate, as required by 10 CFR 32.29(c)(3)(ii), for each model number, the total quantity of the radionuclide that has been transferred. Further information about the requirements that apply to annual reports of exempt distribution can be found in the attached Regulatory Issue Summary.

A hard copy of your revised report should be addressed and sent to:

ATTN: Document Control Desk/Exempt Distribution
Director, Office of Nuclear Material Safety and Safeguards
U.S. Nuclear Regulatory Commission
Washington, DC 20555-0001

Please be aware that upon your request, proprietary information submitted to the NRC may be withheld from public disclosure. To do this, you must follow the procedures in 10 CFR 2.390(b) including requesting withholding at the time the information is submitted and complying with the document marking and affidavit requirements set forth in 10 CFR 2.390 (b)(1).

If you have any questions, please feel free to contact me.

Regards,
Eric
