SUBJECT: VOID LETTER CONCERNING LICENSE AMENDMENT
CONTROL NUMBER 589614

The Nuclear Regulatory Commission (NRC) has received your request for a license amendment request in letter dated November 12, 2015. A review made by this office identified conflicting information as described below.

1. The licensee requested authorization for an activity per source that exceeds the activity authorization listed in the sealed source and device (SSD) registration certificate that was provided.
2. The device model number (Vx) that the license provided matches two SSD registration certificates that authorize generally licensed devices (enclosures).

The license amendment request described in letter dated November 12, 2015 is being voided without prejudice. You can resubmit your amendment request by providing the SSD registration certificate for the corresponding specifically licensed device that matches the device model number that you want authorized in specific license 42-00090-03.

In accordance with 10 CFR 2.390 of the NRC's "Rules of Practice," a copy of this letter without the enclosures will be available electronically for public inspection in the NRC Public Document Room or from the NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Thank you for your cooperation.

Sincerely,

/RA/

Roberto J. Torres, M.S., Senior Health Physicist
Nuclear Materials Safety Branch B
