Subject: [External_Sender] RE: NRC Offer of Public Meeting to Discuss EGC's Appeal of Compliance Backfit Affecting Braidwood and Byron

Ms. Bailey,

This email is to confirm EGC's acceptance of the NRC's December 23, 2015, offer to present the Braidwood and Byron backfit appeal to the panel at a public meeting.

Jessica Krejcie is also supporting this effort and can be reached at 630-657-2816. Both Jessica and I will work with you and Alex Garmoe to further define meeting logistics, attendees, and materials.

Thank you,

David Gullott

Subject: [EXTERNAL] NRC Offer of Public Meeting to Discuss EGC's Appeal of Compliance Backfit Affecting Braidwood and Byron

Mr. Gullott,

On December 23, 2015, the NRC sent Exelon Generation Company, LLC (EGC) a letter (ADAMS ML15351A372) acknowledging receipt of EGC's appeal (ADAMS ML15342A112) of the imposition of a compliance backfit affecting Braidwood and Byron Generating Stations (ADAMS ML14225A871). In that letter we indicated that a backfit review panel would be appointed and that EGC would be offered an opportunity to present its appeal to the panel at a public meeting. In a memorandum dated January 23, 2016 (ADAMS ML15355A081), the Office Director of Nuclear Reactor Regulation appointed me as Chairman of the backfit review panel. It is my understanding that you are the EGC point of contact that the NRC should interface with for this issue.

The purpose of this message is to confirm whether EGC would like to present to the backfit review panel at a public meeting. Please communicate EGC's response in a reply to this message no later than Friday, January 22. You do not need to include expected attendees, planned presentation materials, or other technical information in your reply. We will discuss those logistical details at a later date.

This message and your reply will be entered into ADAMS as an official Agency record documenting the public meeting decision.

Please do not hesitate to contact me at (301) 415-7250 or my project manager, Alex Garmoe, at (301) 415-3814, with any questions or concerns.

Thank you,

Marissa Bailey, Acting Director
Division of Engineering
Office of Nuclear Reactor Regulation
U.S. Nuclear Regulatory Commission
