RULES AND REGULATIONS

## General Comment

My daughter, age 34 received RAI in October, and as a nurse I was appalled at that lack of information on discharge from our University Medical Center. Information that we followed was from other Universities web sites that we searched on the web. The purpose of this study is much needed. Terms such as a few days, meh, were consistent. Even walking out the hospital through full public elevators, stressed us. You may contact us for full details of our experience.
