Dear Dr. Halprin:

Enclosed is Amendment No. 38 terminating your NRC Materials License No. 21-17974-01 in accordance with your request.

In letter dated October 16, 2015, you contacted the U. S. Nuclear Regulatory Commission and indicated that you wished to terminate NRC Materials License No. 21-17974-01 for Tri-County Radiologists, P.C. The aforementioned letter included NRC Form 314, "Certificate of Disposition of Materials," with attachments, supporting the decommissioning of your location at 28351 Schoenherr Road, Warren, Michigan. Additional supporting information was provided by your consultant, Laura Smith, in letter dated November 11, 2015, upon our request.

The NRC staff has reviewed all of this information, including your final status surveys. Based on its review, the staff has concluded that all licensable radioactive material has been removed from your facility and residual radioactive material attributable to licensed activities does not exceed current NRC criteria.

Based on these conclusions, no further remediation or actions with respect to NRC regulated material is required. Your facility at 28351 Schoenherr Road, Warren, Michigan, is suitable for unrestricted use and NRC License No. 21-17974-01 is hereby terminated.

Please review the enclosed document carefully and be sure that you understand all conditions. If there are any errors or questions, please notify the U. S. Nuclear Regulatory Commission, Region III office at (630) 829-9887 so that we can provide appropriate corrections and answers.

In accordance with Title 10 of the *Code of Federal Regulations* Section 2.390 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the NRC's Agencywide Documents Access and Management System (ADAMS), accessible from the NRC Web site at <http://www.nrc.gov/reading-rm/adams.html>.

Sincerely,
