Re: Oconee Unit 2  
Docket No. 50-270

Dear Sir:

**Regulatory**

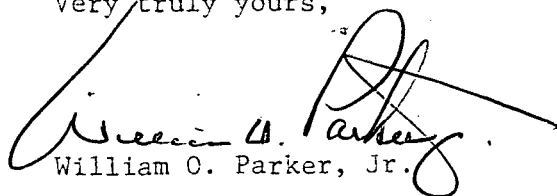

**U.S. NRC**

Our letter of May 6, 1977 proposed revisions to the Oconee Nuclear Station Technical Specifications to assure the operation of the Oconee Unit 2, Cycle 3 core within applicable fuel design and performance criteria. It is requested that this submittal be revised to account for the cycle length of 277 EFPD for Oconee Unit 2, Cycle 2, and to include the insertion of 12 assemblies in Oconee Unit 2 Cycle 3 from Oconee Unit 3 Batch 1.

Therefore, pursuant to 10CFR50 §50.90 proposed changes to the Oconee Nuclear Station Technical Specifications are requested which will provide for Oconee Unit 2, Cycle 3 operation considering these revisions. The proposed changes are shown in Attachment 1 as replacement pages for the figures previously submitted in our May 6, 1977 letter.

Also attached is an amendment to Babcock & Wilcox's Report BAW-1542, "Oconee Unit 2, Cycle 3 Reload Report". This amendment includes a summary of Cycle 3 operating parameters affected by this revision and contains the safety analysis supporting the operation of Oconee Unit 2, Cycle 3 core at rated power in accordance with the revised Technical Specifications provided.

Very truly yours,

  
William O. Parker, Jr.

WILLIAM O. PARKER, JR., being duly sworn, states that he is Vice President of Duke Power Company; that he is authorized on the part of said Company to sign and file with the Nuclear Regulatory Commission this request for amendment of the Oconee Nuclear Station Facility Operating Licenses DPR-38, DPR-47, and DPR-55; and that all statements and matters set forth therein are true and correct to the best of his knowledge.

William O. Parker, Jr. Vice President

Subscribed and sworn to before me this 21st day of June, 1977.

  
Notary Public
