Mr. Edson G. Case, Acting Director  
Office of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Reference: Oconee Unit 2  
Docket No. 50-270

Dear Sir:

**Regulatory**

In accordance with our letter of June 21, 1977 which proposed revisions to the Oconee Nuclear Station Technical Specifications concerning steam generator tubing surveillance, a report is to be submitted within 30 days following each inservice inspection of steam generator tubes. The report is to provide the number of tubes plugged in each steam generator as a result of that inspection.

The purpose of this letter is to advise you that four tubes in the Oconee Unit 2 B steam generator have been removed from service. This information has previously been relayed to members of your staff by telephone.

Very truly yours,

*William O. Parker, Jr.*
