Re: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Sir:

My letter of April 21, 1977 provided a report entitled "Evaluation of Potential Turbine Building Flooding at the Oconee Nuclear Station". In this report, certain corrective actions were outlined which would mitigate the consequences of the maximum postulated flood condition. The purpose of that letter was to appraise you of our approach and schedule for resolving the issue.

Although the proposed modifications can be implemented pursuant to 10CFR50.59, and prior NRC approval is not required, members of your staff requested the opportunity to review our proposed plans prior to implementation. In as much as complete agreement has not been reached with your staff, it is considered inadvisable to proceed with these modifications at the present time. A revised schedule for implementation will be provided when resolution is achieved.

Very truly yours,

William O. Parker Jr. / JSC

William O. Parker, Jr.
