Docket Nos. 50-269, -270, -287

Dear Sir:

My letter of April 21, 1978 provided certain pertinent information to the staff concerning the apparent error in the B&W small break ECCS analysis applicable to Oconee Nuclear Station. Additionally, a commitment was made to provide a facility operating license amendment to require necessary procedures to implement the required corrective actions.

Please find attached a revised Technical Specification page, which incorporates the necessary operating procedure requirements, and should be included in our original Technical Specification revision submittal of April 20, 1978.

Inasmuch as this submittal supplements our previous submittal of April 20, 1978 and does not represent another license amendment request, additional license fees are not included.

Very truly yours,

William O. Parker, Jr.
