Mr. Benard C. Rusche  
Director of Nuclear Reactor Regulation  
U. S. Nuclear Regulatory Commission  
Washington, D. C. 20555

Re: Oconee Nuclear Station  
Docket Nos. 50-269, 50-270, and 50-287  
McGuire Nuclear Station  
Docket Nos. 50-369, and 50-370

Regulatory

File/Cy

Dear Mr. Rusche:

On May 5, 1975, the Nuclear Regulatory Commission published in the Federal Register an amendment to Title 10, Chapter I, Code of Federal Regulations, Part 50 to add a new Appendix I to 10 CFR Part 50. The effective date of this amendment was June 4, 1975. Section V.B of the new Appendix I required that:

For each light-water-cooled nuclear power reactor constructed pursuant to a permit for which application was filed prior to January 2, 1971, the holder of the permit or license authorizing operation of the reactor shall, within a period of twelve months from June 4, 1975, file with the Commission:

1. Such information as is necessary to evaluate the means employed for keeping radioactivity in effluents to unrestricted areas as low as practicable, including all such information as is required by 50.34 a (b) and (c) not already contained in his application; and
2. Plans and proposed technical specifications developed for the purpose of keeping releases of radioactive materials to unrestricted areas during normal reactor operations, including expected operational occurrences, as low as practicable.

Duke Power Company's Oconee Nuclear Station, operating pursuant to the provisions of Facility Operating Licenses DPR-38, -47 and -55, and McGuire Nuclear Station, under construction pursuant to the provisions of Construction Permits CPPR-83 and -84, are affected by Section V.B of Appendix I. Accordingly, initial actions had begun to demonstrate compliance with the provisions of Appendix I when a June 17, 1975 letter from Mr. Daniel R. Muller, Assistant Director for Environmental Projects, Division of Reactor Licensing, was received. This letter stated that the

13158

staff was in the process of developing specific procedures which would include consideration of the Appendix I guidelines, and expected to have specific guidance available by September, 1975. The letter further stated that the staff's request and schedule for specific information would be transmitted after development of the specific review procedures previously mentioned.

To date, no information has been received from the Commission. Consequently, our plans for demonstrating compliance with Appendix I cannot be finalized. It is, therefore, requested that the Commission issue as soon as practicable the specific review procedures and the requests for specific information to be applied to applicants and licensees subject to Section V.B of Appendix I. If this issuance is expected to be delayed, in the interim it is requested that the Commission advise of the anticipated date for the release of the requested information and of the anticipated nature of the information.

Very truly yours,

A handwritten signature in cursive script, appearing to read "William O. Parker, Jr.", written in dark ink. The signature is fluid and somewhat stylized, with a long horizontal stroke extending to the right.
