RE: Ocoee Docket Nos. 50-269/270/287
 APP. NO.: SC 074 OYN 300037

Dear Mr. Dewey:

In accordance with the Federal Water Pollution Control Act Amendments of 1972, we are nearing the final stages of processing your application for a permit to discharge wastes to navigable waters. To assure that the public notice and the NPDES permit contain current data, please review the above referenced application and, if necessary, update it to reflect current wastewater treatment conditions at the plant.

Our preliminary evaluation of thermal effects indicates that we have insufficient data to assure you that a possibility exists for this facility to qualify for a 316(a) waiver with regard to the thermal component of your discharge. However, if you intend to ask for a 316(a) waiver for this facility, please advise us in your reply. In order to support such a waiver and to develop effluent limitations, monitoring requirements and implementation schedules, the attached additional information and data are required in duplicate and should be mailed within 30 days of receipt of this notification. You may also submit any additional information you have available.

A cover letter signed by the Applicant's Authorized Agent for permit correspondence stating that to his best knowledge the information is accurate, must accompany this additional information.

If you have any questions, please contact me at 404/526-2328.

Sincerely,

Charles H. Kaplan
 Chief, Thermal Analysis Section
 Water Enforcement Branch
