Dear Mr. Giambusso:

Transmitted herewith are sixty (60) copies of a Babcock & Wilcox PROPRIETARY report, BAW-1399, "Oconee 3 Fuel Densification Report".

This report together with Babcock & Wilcox PROPRIETARY Topical Report BAW-10054, Revision 2, present the specific results for the Oconee 3 cycle 1 fuel and support operation of this plant at rated power (2568 Mwt). This report will be incorporated by Duke Power Company into its license application by separate letter.

Babcock & Wilcox requests that this report be treated as proprietary in nature because we have independently conducted studies to investigate the extent and effects of fuel densification. Disclosure of this information would provide knowledgeable individuals with information which would impair B&W's competitive position in this area. Portions of this information have been held as confidential within the Company and have not been disclosed to any other person or persons except on a proprietary basis.

Very truly yours,
