4760

Office of Nuclear Reactor Regulation, U. S. Nuclear Regulatory Commission Washington, D. C. 20555

Re: Oconee Nuclear Station Docket Nos. 50-269, 50-270, 50-287

Dear Mr. Rusche:

Pursuant to 10 CFR 50, Section 50.90, an amendment to Section 6.1 of the Oconee Nuclear Station Technical Specifications, Appendix A to Facility Operating Licenses DPR-38, -47, and -55 is proposed. Specifically, please find attached a proposed change to Figure 6.1-1 entitled "Station Organization Chart". This chart is referenced by Technical Specification 6.1.1.3 and depicts the station organization for Operations, Technical Services, and Maintenance. Proposed changes to the station organization as reflected by this chart are as follows:

The "Instrument and Control" section has been redesignated as the "Instrument and Electrical" section, and the "Maintenance" section has been redesignated as the "Mechanical Maintenance" section.

By redistributing personnel assignments, the Maintenance Organization is more effectively divided into two more distinct branches, with one branch responsible for only mechanical maintenance and the other only for electrically-related maintenance. This reorganization provides a more logical assignment of maintenance personnel and thereby will afford a more efficient overall Maintenance Organization.

We request that approval of this Technical Specification change be granted as expeditiously as possible.

Very truly yours. William O. Parker, Jr.

Mr. Benard C. Rusche May 7, 1976 Page 2

WILLIAM O. PARKER, JR. being duly sworn, states that he is Vice President of Duke Power Company; that he is authorized on the part of said Company to sign and file with the Nuclear Regulatory Commission this request for amendment of the Oconee Nuclear Station Facility Operating Licenses DPR-38, DPR-47 and DPR-55; and that all statements and matters set forth therein are true and correct to the best of his knowledge.

arke William O. Parker, Jr., Vice President
