DUKE POWER COMPANY

POWER BUILDING 422 South Church Street, Charlotte, N. C. 28242

WILLIAM O. PARKER, JR. VICE PRESIDENT

June 23, 1977

STEAM PRODUCTION

Mr. Edson G. Case, Acting Director Office of Nuclear Reactor Regulation U. S. Nuclear Regulatory Commission Washington, D. C. 20555

Attention: Mr. A. Schwencer, Chief Operating Reactors Branch #1

Reference: Oconee Nuclear Station Docket Nos. 50-269, -270, -287

Dear Sir:

Your letter of May 5, 1977 requested that a proposed amendment to the Oconee Nuclear Station Technical Specifications be submitted which would establish limits on iodine activity in the reactor coolant and secondary coolant systems. The purpose of this letter is to advise you that an assessment is in progress to establish appropriate limits on iodine activity in the reactor and secondary coolant systems to assure that dose rates from postulated accidents are well within the limits of 10CFR100. It is expected that these Technical Specifications will be submitted by July 15, 1977.

Very *t*ruly yours, 1. rach William O. Parker, Jr.

MST:ge
