Mr. Edson G. Case, Acting Director
Office of Nuclear Reactor Regulation
U. S. Nuclear Regulatory Commission
Washington, D. C. 20555

Attention: Mr. A. Schwencer, Chief
Operating Reactors Branch #1

Reference: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

Dear Mr. Case:

Your letter dated May 20, 1977 outlined a threefold program which was considered appropriate for Duke Power Company to evaluate the potential seismic activity at the Jocassee Dam. The parts of this program were: (1) a short-term report, (2) a monitoring program, and (3) a longer-term report that will describe the findings of the monitoring program.

The short-term report is in preparation and will be submitted in the near future incorporating those items identified in the letter and as discussed with members of your staff on June 22, 1977.

In a letter dated October 24, 1976, Duke Power Company committed to reinstitute the seismic monitoring program which had been in effect from November, 1975 to June 30, 1976. This program was initiated on November 1, 1976 and has provided four to six portable micro-earthquake recorders until June 8, 1977. As previously discussed with members of your staff, one permanent station and two portable instruments have been in operation since June 8, 1977. Beginning approximately July 15, 1977 it is our intention to maintain either the one permanent station and four portable instruments in operation or to provide a total of three permanent stations until December 1, 1978. By letter dated March 22, 1977 information on the monitoring program through February, 1977 was provided. Quarterly reports will be provided within 45 days of the completion of the quarter for future data. Prompt telephone reporting of any unusual seismic activity will be made. A long-term summary report will be submitted which will discuss the results of the monitoring program through November, 1978; however, it is expected that this report will be submitted by February 15, 1979 rather than your requested date of January 1, 1979.

Mr. Edson G. Case, Acting Director
Page Two
July 8, 1977

This letter constitutes Duke Power Company's commitment to complete the programs outlined in this letter. We believe this is responsive to NRC requests for information. It is our view that the additional commitments in this letter are no different than others made with regard to providing information to the Commission. An amendment to the Facility Operating License is not considered necessary in this regard. The program which began at Duke Power Company's initiative in November, 1975 and is to continue to November, 1978 will not be enhanced by the issuance of an amendment to the Facility Operating License.

Very truly yours,

William O. Parker, Jr.
