RE: Oconee Nuclear Station
Docket Nos. 50-269, -270, -287

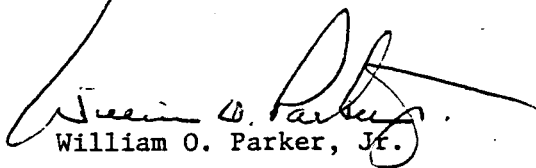

Dear Sir:

During the refueling outage following the Cycle 3 operation of the Oconee Nuclear Station Unit 1 core, fuel assembly 1D40 sustained damage to one corner fuel rod while conducting the post irradiation examinations in the spent fuel pool. No release of radioactive materials occurred as a result of this damage. The attached report describes the handling history and damage in detail, discusses the planned disposition of the assembly and assesses the potential hazards associated with this action.

Pursuant to 10CFR50.90, an amendment to the Oconee Nuclear Station Facility Operating Licenses DPR-38, -47, and -55 is requested which will permit the disposition of one fuel rod from fuel assembly 1D40 as described in this submittal. It is requested that this approval be granted by November 15, 1977.

Very truly yours,

William O. Parker, Jr.

WILLIAM O. PARKER, JR., being duly sworn, states that he is Vice President of Duke Power Company; that he is authorized on the part of said Company to sign and file with the Nuclear Regulatory Commission this request for amendment of the Oconee Nuclear Station Facility Operating Licenses DPR-38, DPR-47, and DPR-55; and that all statements and matters set forth therein are true and correct to the best of his knowledge.

William O. Parker, Jr., Vice President

Subscribed and sworn to before me this 14th day of October 1977.
