Attention: Mr. A. Schwencer, Chief
Operating Reactors Branch #1
Docket Nos. 50-269, -270, -287

Dear Sir:

In your letter of November 10, 1977, additional information was requested concerning the Oconee Nuclear Station Turbine Building Flooding Problem. The answers to these questions were scheduled to be provided by January 16, 1978, but will be delayed until after a joint NRC/DPR meeting to be held in Washington on January 18, 1978. At this meeting, a description of an independent safe shutdown facility, which Duke is considering installing at Oconee, will be presented. This system would address security and fire protection concerns as well as the Turbine Building flooding issue at Oconee Nuclear Station.

Very truly yours,

William O. Parker, Jr.
