

February 4, 2016

Mr. Terry D. Hobbs
General Manager, Decommissioning
Crystal River Nuclear Plant (NA2C)
15760 W. Power Line Street
Crystal River, FL 34428-6708

SUBJECT: CRYSTAL RIVER UNIT 3 NUCLEAR GENERATING PLANT - REQUEST FOR
ADDITIONAL INFORMATION LICENSE AMENDMENT REQUEST FOR
EMERGENCY PLAN CHANGES (TAC NO. L53072)

Dear Mr. Hobbs:

By letter dated August 27, 2015 (Agency-wide Documents Access and Management System (ADAMS) Accession No. ML15246A231), Duke Energy Florida, Inc. (DEF) requested a license amendment to the Permanently Defueled Emergency Plan (PDEP) and Permanently Defueled Emergency Action Level (EAL) Bases Manual, for the Crystal River Unit 3 Nuclear Plant (CR-3). DEF requests approval of a revision to the CR-3 PDEP and Permanently Defueled EAL Bases Manual to reflect the planned use of an Independent Spent Fuel Storage Installation (ISFSI). As a result of the installation of an ISFSI within the Protected Area of the CR-3 site, DEF determined that changes to the PDEP and Permanently Defueled EAL Bases Manual were warranted.

Based on the staff's initial review of the submittal, the enclosed Requests for Additional Information (RAIs) are necessary to facilitate the staff's further technical review.

Sincerely,

/RA/

John B. Hickman, Project Manager
Reactor Decommissioning Branch
Division of Decommissioning, Uranium Recovery,
and Waste Programs
Office of Nuclear Material Safety
and Safeguards

Docket No.: 050-0302

Enclosure: RAIs

cc w/Encl.: Distribution via Listserv

**CRYSTAL RIVER UNIT 3 NUCLEAR GENERATING PLANT
REQUEST FOR ADDITIONAL INFORMATION
LICENSE AMENDMENT REQUEST FOR EMERGENCY PLAN CHANGES (TAC NO. L53072)**

CR-3-RAI-01

In a letter dated May 23, 2014 (ADAMS Accession No. ML14154A408), DEF submitted Revision 1 to the PDEP and Revision 1 to the Permanently Defueled EAL Bases Manual. In a letter dated October 6, 2014 (ADAMS Accession No. ML14288A122), DEF submitted Revision 2 to the PDEP. Finally, in the August 27, 2015, letter cited above, DEF submitted Revision 2 to the PDEP and Revision 1 to the Permanently Defueled EAL Bases Manual (duplicate numbers, in both cases, to previous submittals). Please explain the revision numbering process for both documents.

CR-3-RAI-02

In the May 23, 2014, DEF letter cited above, containing Revision 1 to the PDEP, it is noted in the "Summary of Changes" that references were deleted from the Emergency Management Network (EMNet) as the back-up communications system to the State Watch Office. The August 27, 2015, DEF letter containing Revision 2 to the PDEP, also states "Deleted EMnet." Please explain the revision process regarding the elimination of EMnet, since based on DEF's May 23, 2014 correspondence, it is understood that commercial telephones (landlines) or cellular telephones are viewed as the back-up means of communications (to the State Hot Ringdown) with off-site emergency response organizations. Also, please confirm that the State of Florida is in agreement with the means of communication between CR-3 and the State.
