Submitter Information

Name: Eric Jones

General Comment

The following comment is made regarding Section X.M2:

Pg X.M2-3: The term "active field region" is used in two places without being defined. This term is not commonly used in the regulatory framework. For example, it does not appear at all in NRC RG 1.190. If this term is meant to refer to the active fuel region, consider changing it thusly, or consider using a term more inline with NRC RG 1.190, such as "core beltline region".
