**Subject:** RE: Diablo Canyon 1 and 2 - State Comments on the License Amendment Federal Register Notice (CAC Nos. MF2333 and MF2334)

Mr. Cochran,

Good Morning! When the NRC publishes an initial notice that we are reviewing a request and that we've made a no significant hazards consideration determination, it's usually 30 days following the notice in the Federal Register, but the staff will normally respond to comments within the hearing period (usually 60 days).

Comments from the State, however, are handled a bit differently than the public. I'm guessing that Mr. Lingam sent you the below email for your comments since the NRC expects to issue the Diablo Canyon NFPA-805 amendments in the next few weeks. We don't have a set comment period for the State, our regulations say within a "timely manner" of the State notification of impending issuance of the licensing action.

You are certainly within an appropriate time frame for this amendment. Since Mr. Lingam is on leave, I am happy to take your comments. We've received some 'weather' here in DC today and I'm working at home. If you'd like to discuss by phone, I can be reached through the NRC Operator at 301-415-7000, ask for Lisa Regner at home.

Let me know if you have any other questions I can help with.  
Have a great day,  
Lisa Regner

### **Lisa Regner**

**Subject:** [External\_Sender] Diablo Canyon 1 and 2 - State Comments on the License Amendment Federal Register Notice (CAC Nos. MF2333 and MF2334)

Good day Lisa,

In reference to the highlighted item below, when does the comment period close?

"Pacific Gas and Electric Company submitted a license amendment application dated June 26, 2013 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML131960159), as supplemented by letters dated October 3, 2013; September 29, October 27, October 29, November 26, and December 31, 2014; February 25, February 25, May 7, October 15, and December 31, 2015; and January 28, 2016 (ADAMS Accession Nos. ML13277A457, ML14272A470, ML14300A706, ML14302A804, ML14332A120,

ML14365A377, ML15056A774, ML15056A776, ML15127A649, ML15300A005, ML15365A534, and ML16028A494, respectively), for Diablo Canyon Power Plant (DCPP), Units 1 and 2 requesting NRC approval. The amendment requests approval to transition the DCPP fire protection program to a risk-informed, performance-based program based on National Fire Protection Association (NFPA) 805, "Performance-Based Standard for Fire Protection for Light Water Reactor Electric Generating Plants, 2001 Edition" (NFPA 805), in accordance with Title 10 of the *Code of Federal Regulations* (10 CFR), Paragraph 50.48(c). NFPA 805 allows the use of performance-based methods such as fire modeling and risk-informed methods such as fire probabilistic risk assessment to demonstrate compliance with the nuclear safety performance criteria.

No significant hazards consideration was published in the *Federal Register* on December 26, 2013 (78 FR 78408) for the above described license amendment. **Please provide your comments, if any, on the issuance of the above described license amendment.**"

Thank you for your time and consideration.

Best Regards,

**Justin Cochran, Ph.D.**
