MEMORANDUM TO: Kevin Hsueh, Chief  
Licensing Processes Branch  
Division of Policy and Rulemaking  
Office of Nuclear Reactor Regulation

FROM: Joseph A. Golla, Project Manager */RA/*  
Licensing Processes Branch  
Division of Policy and Rulemaking  
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF DECEMBER 21, 2015, TELECONFERENCE WITH  
GENERAL ELECTRIC-HITACHI

On Monday, December 21, 2015, the U.S. Nuclear Regulatory Commission (NRC) staff and General Electric-Hitachi (GEH) staff held a phone teleconference regarding the July 19, 2011, letter from GEH (Agencywide Documents Access and Management System Accession No. ML112000552) regarding the NEDC-33006P, maximum extended load line limit analysis plus (MELLLA+) safety evaluation (SE). Mr. Christopher Jackson, Mr. George Thomas, and Mr. Diego Saenz were on the teleconference call from the NRC and Jim Harrison was on the call from GEH. The GEH representative stated that GEH had a corrective action item related to the letter and wanted to close the issue, further stating that GEH believed that either a revision to the SE or a response to the letter would be beneficial. The NRC staff stated that a revision to the SE could potentially open the SE to other items such as minimum stable film temperature and would not be a trivial matter. The NRC staff also stated that a response to the letter would not give all of the benefits that GEH wanted. The NRC staff highlighted that the stated purpose of the July 19, 2011, letter from GEH was to prevent potential issues with plants that apply for MELLLA+ with GNF2 fuel; however, Grand Gulf Nuclear Station was approved and the issue has not come up during the review of Peach Bottom Atomic Power Station, Units 2 and 3, both of which requested MELLLA+ with GNF2 fuel. As such, the NRC staff saw this as something that might provide marginal benefit. The GEH representative then stated that it may be enough to rely on the precedent of other licensing applications and agreed with the NRC staff that the benefit would likely not be worth the cost in time and money. The GEH representative and the NRC staff agreed that the issue is resolved and that no action was needed at this time.
