**Re: Semi-Annual Reporting Pursuant to License Condition 11.1(B)
2nd Half 2015
Lost Creek ISR Project, License SUA-1598**

To Whom It May Concern:

The following semi-annual report has been submitted in accordance with License Condition 11.1(B) for Lost Creek ISR, LLC's (LCI) Lost Creek ISR Project (LC-ISR) License SUA-1598. License Condition 11.1(B) requires semi-annual reporting of:

- Status of production areas in operation,
- Status of production areas in restoration,
- Status of any long-term excursions, and
- A summary of Mechanical Integrity Testing (MIT) of wells.

The reporting period for this report is July 1 through December 31, 2015.

Status of Production Areas in Operation

By the end of the reporting period, twelve (12) header houses were in operation as approved by Wyoming Department of Environmental Quality – Land Quality Division (WDEQ-LQD). The following table (**Table 1**) provides a status of production for operating mine units as of the end of the reporting period:

NM5501

Table 1: Operational Status Summary

Mine Unit	Header Houses	Status	Start Date	Average Number Wells Injecting*	Average Number Wells Producing*
Mine Unit 1	HH1-1	In Operation	02Aug2013	25	10
	HH1-2	In Operation	15Aug2013	28	11
	HH1-3	In Operation	18Sep2013	34	12
	HH1-4	In Operation	04Feb2014	40	11
	HH1-5	In Operation	11Mar2014	29	12
	HH1-6	In Operation	16Jul2014	45	13
	HH1-7	In Operation	11Dec2014	42	19
	HH1-8	In Operation	10Jan2015	37	19
	HH1-9	In Operation	12Feb2015	43	22
	HH1-10	In Operation	18Jun2015	53	22
	HH1-11	In Operation	02Sep2015	51	23
	HH1-12	In Operation	11/17/2015	50	27
Mine Unit 2	N/A	Not constructed	N/A	N/A	N/A
Mine Unit 3	N/A	Not constructed	N/A	N/A	N/A

*Average number of operating wells per reporting period

Status of Production Areas in Restoration

No restoration activities had been initiated during the reporting period.

Long-Term Excursions

One well, MU-109, had been on excursion status during the reporting period (since May 27, 2015) but was declared corrected as described in the summary report submitted to the NRC dated October 27, 2015.

Summary of MITs

During the reporting period, a total of 37 MITs were performed. MITs were performed in accordance with the approved Permit Operations Plan Section 3.4. Results are summarized on **Attachment I**. The MITs resulted in 33 successful tests with 4 failures. Wells with failed tests were managed with one of the following actions:

- Well was repaired and retested with a successful test;
- Well was swabbed and retested with a successful test; or

- Well was or will be plugged and abandoned.

Of the 4 net failed tests, 3 wells failed and were or will be plugged and abandoned in accordance with procedures described in the approved License Application Technical Report Section 6.3.2.

If you have any questions regarding this letter or require additional information please feel free to contact me at the Casper office.

Sincerely,

Michael D. Gaither
Manager EHS and Regulatory Affairs

37 Total MITs
33 Pass
4 Fail
36 Wells Tested
3 Wells Failed

(1) MIT method for "Monitoring Wells" as described in NRC License Application Technical Report Section 3.2.5. Test performed by using packer(s) to isolate casing interval and then pressurize well.

(2) Plugging and abandonment (P&A) performed according to NRC License Application Technical Report Section 6.3.2

TBA = To be abandoned

I = Class III Injection Well

P = Class III Production Well

M = Monitor Well

T = Pump Test Well
