Anna,

Just one other comment & I promise you won't have to put up with any more of my inconvenient truths.

One of your proposed questions at the forum was,

*"Will Entergy be responsible to continue funding local towns?"*

I suggest you drop this question.

You & your comrades have rejoiced over the Entergy announcement that Pilgrim will be shutdown and decommissioned. You will be only too happy to dance on its grave. Many of your neighbors will be hurt by its closing, hundreds of jobs lost at the plant, and untold damage to the many local small businesses & all their employees who will be hurt by Pilgrim's closure. It will wreak a horrible economic price on the local community. After all that you have the audacity to ask how long you & your local towns can continue to feed on Pilgrim's corpse!

How sad & sick you are!

Rich

---

Thanks Anna.

Take care.  
Rich

---

Rich, I do indeed work toward eliminating several of the other social risks you mention (thank you for the suggestions). I am sorry I included you on this invitation. I will remove you from all future correspondences.

Anna

---

I think it is high time to move on Anna.

You have successfully driven a stake thru this particular nuclear vampire!

Not due to any of your past efforts or those of your comrades, or my efforts, and certainly not due to the efforts of a lax nuke regulator, has Pilgrim joined a growing list of old nuke plants who simply can no longer survive stiff energy competition.

Thank God, that despite heavy governmental nuke subsidies, the free enterprise system is doing a good thing we never could pull off.

Also Anna, operating nuke plants have been & are a real threat to public health & safety. But please name one nuclear plant anywhere on our planet that has been any threat to anyone after it has been shutdown! And certainly nary a one that is going thru a decommissioning process.

Time to go after a real threat to Americans.

Suggestions...

Support neighborhood watch programs that now face a much greater threat from terrorism.

Focus on efforts to clean and protect our precious oceans, our lakes & oceans, our water supplies.

The quality of our air, especially against the coal & gas-fired units in your backyard!

Perhaps even help the poor & indigent.

But of course I should be preaching to the choir!

Time to go OCD on something that will make a real difference!

Rich

---

**Subject:** March 23 Decommissioning Forum  
**Sent:** Mon, Feb 8, 2016 3:16:16 PM

Dear Friends,

On Wednesday, March 23rd, the Pilgrim Coalition will be hosting a Decommissioning Forum at the Plymouth Public Library from 7-9:30pm. We would like to invite you to attend the presentation and ask questions. The forum is open to regional and local representatives, along with concerned neighbors from across towns, as this is not just an issue limited to Plymouth. The forum will provide objective, expert panelists from across the region who have previously dealt with decommissioning issues, know the risks involved, and know how to plan with the public in mind.

Here are some questions that will be covered during the panelists presentations: *Who Pays? Will Entergy be responsible to continue funding local towns? Will the site be cleaned up? If so, when?*

Attached is the flyer for the event with the bios of the panelists. We hope you, your friends and colleagues will join us.

Thank you,  
Anna Baker  
Chair, Pilgrim Coalition  
On Behalf of the Pilgrim Coalition Steering Committee
