**Cc:** 'BICE, DAVID B (ANO)'  
**Subject:** Acceptance Review Results - ANO2-ISI-018 and ANO2-ISI-019 (CAC Nos. MF7271 and MF7272)

Mr. Clark,

By letter dated January 14, 2016 (Agencywide Documents Access and Management System (ADAMS) Accession No. ML16015A276), Entergy Operations, Inc. (Entergy, the licensee), submitted relief requests ANO2-ISI-018 and ANO2-ISI-019 for Arkansas Nuclear One, Unit 2. The applications request relief from American Society of Mechanical Engineers Boiler & Pressure Vessel Code requirements regarding volumetric examinations of pressurizer nozzle welds (ANO2-ISI-018) and certain shutdown cooling heat exchanger circumferential welds (ANO2-ISI-019) pursuant to Title 10 of the *Code of Federal Regulations* Section 50.55a(g)(6)(i).

The purpose of this correspondence is to provide the results of the U.S. Nuclear Regulatory Commission (NRC) staff's acceptance review of the above relief requests. The acceptance review was performed to determine if there is sufficient technical information in scope and depth to allow the NRC staff to complete its detailed technical review. The acceptance review is also intended to identify whether the application has any readily apparent information insufficiencies in its characterization of the regulatory requirements or the licensing basis of the plant.

The NRC staff has reviewed your application and concluded that it provides technical information in sufficient detail to enable the staff to proceed with its detailed technical review and make an independent assessment regarding the acceptability of the proposed relief requests in terms of regulatory requirements and the protection of public health and safety and the environment. If additional information is needed for the staff to complete its technical review, you will be advised by separate correspondence.

Sincerely,

Andrea George  
Project Manager  
Division of Operating Reactor Licensing  
U.S. Nuclear Regulatory Commission  
301-415-1081
