**Subject:** Request for Revision to 2015 Exempt Transfer Report; Rocky Mountain Instrument Co.; License No. 05-35173-01E  
**Attachments:** RIS 2014-10 Exempt Distribution.pdf

Dear Mr. Minton,

I've reviewed your exempt distribution report for 2015, which is dated January 26, 2016.

Please revise and resubmit your report to address the following issues in accordance with the reporting requirements in 10 CFR 40.53(c). Your report should only cover products transferred to other persons for use under 10 CFR 40.13(c), which only applies in the U.S.; therefore, you should report only on material that is distributed within the U.S. You should report distributions for the entire year, rather than on a quarterly basis. You should not organize the information according to individual customers; rather, information should be reported according to the products that are distributed. You should report the total amount of thorium that was transferred in each type of product and each model number. Also, the number of units of each type of product transferred should be reported by model number, if applicable. Further information about the requirements that apply to annual reports of exempt distribution can be found in the attached Regulatory Issue Summary.

A hard copy of your revised report should be addressed and sent to:

ATTN: Document Control Desk/Exempt Distribution  
Director, Office of Nuclear Material Safety and Safeguards  
U.S. Nuclear Regulatory Commission  
Washington, DC 20555-0001

Please be aware that upon your request, proprietary information submitted to the NRC may be withheld from public disclosure. To do this, you must follow the procedures in 10 CFR 2.390(b) including requesting withholding at the time the information is submitted and complying with the document marking and affidavit requirements set forth in 10 CFR 2.390 (b)(1).

If you have any questions, please feel free to contact me.

Regards,  
Eric
