February 11, 2016

Chairman Stephen G. Burns
U.S. Nuclear Regulatory Commission
11555 Rockville Pike
Rockville, MD 20852

Dear Chairman Burns,

I would like to join with other colleagues who have written to call upon you to conduct a thorough and complete investigation into the recent tritium leaks at Indian Point Nuclear Power Plant. My understanding from the media is that you are investigating the events surrounding this issue, and that the NRC will or currently is conducting studies of the leak of this radioactive material.

I am sure you are aware of the anxiety among my constituents, many of whom live very near to the site. I would appreciate being updated as information is available on the severity, containment, and clean-up of the leak.

Sincerely,

Sandy Galef
95th A.D.
