ATTN: Document Control Desk/Exempt Distribution

Dear Sir,

Attached, please find the annual byproduct material transfer report for the above Distribution License. The referenced license authorizes Philips Lighting Company to distribute electron tubes, glow switches, and inner arc tubes containing byproduct material to persons exempt from licensing pursuant to Section 30.15, 10 CFR Part 30.

The last material transfer report for this license was filed in January 2015 and covered material transfers for calendar year 2014. The attached report reflects material transfers for calendar year 2015. Therefore, we are consistent in submitting this information without gaps in our reporting coverage.

As has been past practice, and accepted by the NRC in prior correspondence, the attached report summarizes the material transfers by licensed isotope. If the NRC requires a description or identification of each product and model number transferred, this information can be provided. However, such information would be provided only as proprietary business information that must remain confidential. Public disclosure would expose confidential sales information to our market competitors.

If there are any questions regarding this report, or its submission, please contact me directly by phone (908-705-4743) or by e-mail (dean.weeks@philips.com).

Best regards,

Dean Weeks
Senior Project Manager
