**SUBJECT:** UNIVERSITY OF PUERTO RICO, REQUEST FOR ADDITIONAL INFORMATION CONCERNING APPLICATION FOR AMENDMENT TO LICENSE, CONTROL NO. 589049

Dear Mrs. Santiago:

This is in reference to your application dated September 29, 2015, requesting renewal of Nuclear Regulatory Commission License No. 52-10510-04. In order to continue our review, we need the following additional information:

Section 8.7 of [NUREG-1556, Volume 7, "Program-Specific Guidance about Academic, Research and Development, and Other Licenses of Limited Scope Including Gas Chromatographs and X-Ray Fluorescence Analyzers"](#) (NUREG-1556, Volume 7), requires that the applicant:

- a. name each proposed authorized user with the types and quantities of licensed material to be used; and
- b. provide information demonstrating that each authorized user is qualified by training and experience to use the requested licensed materials.

Your application did not provide information regarding the University's authorized users. **Please respond with the name of each proposed authorized user, the types and quantities of licensed material to be used, and provide information demonstrating that each authorized user is qualified by training and experience to use the requested licensed materials.** If the users are already listed on the license, you do not need to provide information regarding their training and experience unless they are being authorized for new materials not already authorized for their use.

Current NRC regulations and guidance are included on the NRC's website at [www.nrc.gov](http://www.nrc.gov); select **Nuclear Materials; Med, Ind, & Academic Uses**; then **Licensee Toolkits, see our toolkit index page**. You may also obtain these documents by contacting the Government Printing Office (GPO) toll-free at 1-866-512-1800. The GPO is open from 8:00 a.m. to 5:30 p.m. EST, Monday through Friday (except Federal holidays).

We will continue our review upon receipt of this information. Please reply to my attention at the Region I Office and refer to Mail Control No. 589049. **You may respond via e-mail with a written, signed and scanned document in pdf format if you find it more convenient.** You may also respond via facsimile to 610-337-5269, or via U.S. Mail to Division of Nuclear Materials Safety, US Nuclear Regulatory Commission Region I, 2100 Renaissance Boulevard, Suite 100, King of Prussia, PA 19406-2713. If you have any technical questions regarding this deficiency letter, please call me at (610) 337-5136.

If we do not receive a reply from you within 30 calendar days from the date of this letter, we will assume that you do not wish to pursue your application.

Sincerely,  
Scott Wilson
