Subject: Voluntary Agreement to Implement CoC 1004 Amendment Revisions Which Remove the Requirement for a Spent Fuel Pool

To: Don Shaw, AREVA TN Licensing Manager

From: Steven Edwards, Manager – Spent Fuel Management

Reference: AREVA Inc. letter E-42575, from Paul Triska (AREVA) to NRC Document Control Desk, “Application for Revision to the Standardized NUHOMS® System – CoC 1004, Amendments 0 through 11 and Amendment 13, Docket 72-1004,” dated August 24, 2015

The purpose of this communication is to confirm the following:

- Duke Energy is aware of and understands the proposed AREVA Inc. changes to the CoC 1004 Standardized NUHOMS® System Technical Specifications and the associated UFSAR changes, which are detailed in the letter referenced above for all approved amendments.
- We understand that these changes will result in Revision 1 to each currently approved CoC 1004 amendment.
- We understand that the previous version of the associated amendments will be superseded in their entirety by Revision 1.
- We agree to voluntarily implement these changes for our general licensee independent spent fuel storage installations (ISFSIs) at the following sites, which operate CoC 1004 Standardized NUHOMS® Systems under one or more amendments:
 - Brunswick Nuclear Plant
 - Oconee Nuclear Station
 - Robinson Nuclear Plant
 - Crystal River Nuclear Plant (planned)
- In order to allow sufficient time to incorporate these changes in a quality manner, we request that AREVA work with the NRC to provide its general licensees a maximum 180-day period after the effective date of the revised amendments during which we can complete incorporation and begin storage operations under the revised amendments.

Sincerely,

Steven Edwards
Manager – Spent Fuel Management
Duke Energy
