Mr. Barkley,

Below are my comments.

From: Richard.Barkley@nrc.gov
To: s.comley.sr@outlook.com
Subject: **RE: NRC letter of 11/19/15 to me (ATTACHED)**
Date: Tue, 23 Feb 2016 19:11:40 +0000

Working on your letter – Just to confirm, is this your understanding of the list of questions? Am I missing any? Yes. **Some of the questions were not addressed fully or at all. Here are my comments in bold to those questions. These were sent in a E-mail to Mr. Burnell from me 10/16/15 at 2:05 PM. I retyped them again here.**

Please outline in a separate letter NRC's reply to me why my home address should not have been used in the letter of NRC 11-19-15 to me. In this reply please include the remarks I made to you on the phone and in a e-mails requesting the date and the list of threats when I informed the NRC of these concerns. Again this is so we will not have to go back and forth like we having to do in my questions for NRC Chairman Burns to address.

-
-
Questions sent to Scott Burnell of the NRC Office of Public Affairs:

- 1) When was a copy of the NRC's May 2015 reply sent to Mass. Rep. Hill? (I know I sent this to you in the past, but if you can't find it, the letter has been available on the NRC ADAMS system (and via Google) at ML15141A187 since late May) **The only letter I have was the one sent to Senator (ATTACHED) Bruce Tarr. I never saw one to Rep. Bradford Hill.**

2) What was the NRC's involvement in the MEMA June 1, 2015, session at Rowley?

Was addressed.

3) When will the NRC hold a meeting with first responders within 10 miles of Seabrook?

We have first responders who will testify there is no way to evacuate people safely in the event of a accident at Seabrook Station. I have been given permission to release the names of these brave first responders to political authorities I trust.

4) Has Chairman been provided a copy of the July 4, 2014, letter and enclosures?

Not addressed. It is quite obviously to me NRC Chairman Stephen Burns either was not provided or certainly did not take the time to read my letter of July 4, 2014 with the noted enclosures. I believe if Chairman had go over the documents he would have never recommended that I contact NRC IG Hubert Bell. If I was Mr. Bell or the NRC I would not want these tapes public either.

5) What avenues does the NRC have to take action against Seabrook if the plant cannot meet emergency preparedness requirements?

Was not fully addressed: Please have NRC Chairman Burns confirm when it is found in the opinion of first responders there is not way to evacuate people safely in the event of a meltdown at Seabrook Station will the NRC require the plant to be shut down?

Was not addressed: I am also requesting that Chairman Stephen Burns respond to the fact there is a GAG (attached letter published in MA & NH papers) orders presently on the MA State Police and the New Hampshire National Guard that these first responders "are not to comment or make any political statements of any kind whether the Seabrook Evacuation Plans could be implemented safely"

In my opinion these GAG orders on first responders make them expendable. These brave citizens have families too to protect and places them in the same category as special needs citizens.

This was not addressed: Is NRC Chairman Burns aware this is the very issue that got me involved into investigating the Nuclear Industries and their so called watchdog, the Nuclear Regulatory Commission? Please provide of Chairman Burns with the response I got from Victor Stello (issue addressed in part of my letter of 7-4-14 with enclosure E) suggesting I leave a paralyzed resident behind and given KI in the event of a meltdown at Seabrook Station. I would like to know whether Chairman Burns thinks this is inhumane treatment for Special needs citizens?

6) How familiar is Chairman Burns with the legal history between the NRC and Mr. Comley?

Was not addressed. Attached Boston Globe Article about the Summary Judgment decision made by Judge Platt for the District of Columbia that Former NRC Executives Director, Victor Stello, NRC Chairman Lando Zech and NRC Law Judge, Ivan Smith were found guilty of violating my constitutional rights as a American Citizen. Would like your legal staff to provide Chairman Burns with the complete case. I would like Chairman Burns reaction to these violation of sacred rights the previous NRC highest officials tried to take from me.

7) How familiar is Chairman Burns with the Office of Inspector General reports conducted by the first and former NRC IG, David Williams completed? Was not addressed. These investigations were and are related to Seabrook construction and operation as well as other Nuclear Plants across the United States. I ask that Chairman Burns retain a copy of these reports and review them. In my opinion these NRC IG investigations are some of the most revealing investigations of the NRC failure to protect the safety of the American people. related to Seabrook construction and operation?

It should be noted by Chairman Stephen Burns that the following NRC IG investigation audits stated, "Review was prompted by allegations from We The People."

- A.. Falsification of Welds Scandal at Seabrook station involving James Padavano who I understand was TOLD to falsify the welds and only spent 6 months in jail for it. More of the falsification of welds happened after Padavano but was never fully investigated due to a GAG order. I spelled this out more fully in my letter of July 4, 2014 in King of Prussia.
- B. NRC IG report of NRC improper disclosure of alleged identities by the NRC's office of investigations to the Tennessee Valley authority.
- C. NRE IG investigative report regarding review of NRC's process for regulation Counterfeit and Substandard Parts used in US. Nuclear Power Plants.
- D. NRC's IG report of NRC's compliance with notice of enforcement discretion policy and procedures.
- E. NRC IG's event inquiry of NRC failure to adequately regulate Millstone Unit `..

8) Why is it appropriate for Seabrook to have an unmanned security location at the entrance to the site? Why is that the NRC cannot at least recommend that the so called Security booth either be torn down or manned. Attracted is a guest column that was published in most MA, NH and was published in 35 counties and 23 languages by EPOCH TIMES a world newspaper. NRC partially addressed this issue but still did not answer why the NRC could not at least recommend that Booth be torn down or manned which may just save some lives.

Lastly, I want Chairman Stephen Burns to know that NRC IG, Mr. Hubert Bell has not contacted me ever since he was notified (will send a copy of that notice) January 23, 2015 by the lawyers in NRC King of Prussia that I have confessed to the Tape-recordings the NRC through the Department of Justice as hoping to acquire during a 6 year battle in MA Federal Court.

In addition, Mr. Bell has not bothered to contact me or respond to any of the safety concerns I mentioned in my letter of July 4, 2014 with enclosures which the authorities in NRC King of Prussia sent him and obviously though he should be made aware of.

Please confirm that NRC Chairman Stephen Burns has been made aware of my letter (attached) to David Williams, Inspector General of the United States Postal Service and former NRC IG.

If you need further comment or clarification on any of these matters please let me know.

Sincerely,

Stephen B. Comley Sr.
