Hi, I see there was a forum on effects of RAI. My name is [redacted] and I am a cancer survivor. I had my thyroid removed 5 years ago at University of Penn Hospital. I had RAI treatments twice. I am now at the National Jewish Hospital with spots on my lungs. They believe it is PAP disease, probably caused by the extreme doses of RAI. I am in a study with The Cleveland Hospital.. Have you ever heard of anyone else with these symptoms?? I am an otherwise very healthy 33 year old female. I also go for lung functioning tests every few months, which so far have been normal. I also get my blood work done to test for my TH levels, and have been stable. Thank for listening, Michele
