**Subject:** Fermi 2 - NRC Issuance of Amendment associated with Surveillance Requirement (SR) 3.5.1.4

Mr. Yale,

The Nuclear Regulatory Commission (NRC) is in the process of approving a license amendment request from DTE Electric Company, for Fermi 2.

The amendment would delete the note associated with Surveillance Requirement (SR) 3.5.1.4 to reflect the Residual Heat Removal (RHR) system design and ensure the RHR system operation is consistent with TS 3.5.1 Limiting Condition for Operation (LCO) requirements.

The NRC staff's proposed no significant hazard consideration determination was published in the Federal Register on November 24, 2015 (80 FR 73235).

Please let me know if you have any comments on this action. I can be reached at 301-415-8004.

Thanks,  
Sue
