RULES AUTOMATICALLY APPLIED

Hello Donna-Beth,

I am the mother of a patient who received I-131 RAI for his thyroid cancer about 6 months ago.

I suggest that patients stay in the hospital or a designated clinic during their most radioactive period, perhaps 3 days, to avoid spreading the radiation. Our very small house could not accommodate our son, which led to great misunderstandings and anger during an already very stressful period.

Thank you. Please feel free to respond if there is any further information I can provide.

Best regards,
