SUBJECT: FEBRUARY 19, 2016, REQUEST FOR WITHHOLDING INFORMATION FROM PUBLIC DISCLOSURE OF THE "SAFETY SYSTEM DIGITAL PLATFORM – MELTAC – [MITSUBISHI ELECTRIC TOTAL ADVANCED CONTROLLER] TOPICAL REPORT REVISION 0" (TAC NO. MF4882)

Dear Mr. Remley:

By letter dated February 19, 2016 (Agencywide Documents Access and Management System Package Accession No. ML16050A199), Mitsubishi Electric Corporation (MELCO) submitted an affidavit executed by Shigeru Sugitani, Senior Manager, Control & Protection Systems Section, Nuclear Power Department, Energy Systems Center, on February 10, 2016, requesting that the information contained in the following document be withheld from public disclosure pursuant to Title 10 of the *Code of Federal Regulations* (10 CFR), Part 2, Section 2.390:

Summary of MELT AC Platform Equipment Qualification JEXU-1041-1023-P (R2).

In an email dated March 23, 2016, Mr. Ken Krayvo representing MELCO clarified that although the transmittal letter identified R0 of JEXU-1041-1023-P, the attachment was R2. Thus, R2 was the version to be withheld.

A nonproprietary version of the information was not submitted. Although 10 CFR 2.390 does not require a nonproprietary version of documents be submitted, the U.S. Nuclear Regulatory Commission (NRC) staff encourages such versions. Having a nonproprietary version of information available helps the NRC meet its Excellence Objective of timely dispersal of information to stakeholders. Given the limited amount of proprietary information in these submissions, providing nonproprietary versions could be easily supported. Please consider submitting a nonproprietary version of reports in the future.

You detailed the reasons for withholding the information in your affidavit.

The NRC staff has reviewed your application and the material in accordance with the requirements of 10 CFR 2.390 and, on the basis of the statements in the affidavit, has determined that the submitted information sought to be withheld contains proprietary commercial information and should be withheld from public disclosure.

Therefore, the version(s) of the submitted information marked as proprietary will be withheld from public disclosure under 10 CFR 2.390(b)(5) and Section 103(b) of the Atomic Energy Act of 1954, as amended.

G. Remley

- 2-

Withholding from public inspection shall not affect the right, if any, of persons properly and directly concerned to inspect the documents. If the need arises, the agency may send copies of this information to its consultants working in this area. The NRC staff will, of course, ensure that consultants have signed the appropriate agreements for handling proprietary information.

If the basis for withholding this information from public inspection should change in the future such that the information could then be made available for public inspection, you should promptly notify the NRC staff.

You also should understand that the NRC staff may have cause to review this determination in the future, for example, if the scope of a Freedom of Information Act request includes your information. In all review situations, if the NRC makes a determination adverse to the above, you will be notified in advance of any public disclosure.

If you have any questions regarding this matter, I can be reached at 301-415-7297 or Joseph.Holonich@nrc.gov.

Sincerely,

/RA/

Joseph J. Holonich, Senior Project Manager
