Subject: [External_Sender] Ginna Reactor Vessel Internals Program Document

Hi Diane,

As discussed during our clarification call yesterday, March 16, the following information is being provided for clarification to Ginna's February 11, 2016 submittal, "Response to Request for Additional Information Regarding Reactor Vessel Internals Program (CAC No. MF6713)."

NRC Question:

Ginna's clevis insert bolts were made from Alloy X-750. Were there any cracks in these bolts?

Exelon Response:

Visual examinations of the Clevis Insert Bolts performed in the 2011 Refueling Outage showed no indication of cracking.

Also, as discussed during the call, no additional information is required. Please let me know if there are any questions regarding this response.

Laura Lynch
