April 26, 2016

Mr. George H. Gellrich
Vice President
Exelon Generation Company, LLC

Lusby, MD 20657

SUBJECT: ISSUANCE OF AMENDMENT NO. 11 TO RENEWED MATERIALS LICENSE
NO. SNM-2505 FOR THE CALVERT CLIFFS SPECIFIC INDEPENDENT
SPENT FUEL STORAGE INSTALLATION (TAC NO. L24912)

Dear Mr. Gellrich:

By letter dated March 26, 2014, as supplemented July 25, October 10, and December 3, 2014, and February 3, and March 10, September 11, September 25, and November 17, 2015, Exelon Generation Company, LLC (Exelon Generation), submitted amendment request No. 11 to the U.S. Nuclear Regulatory Commission (NRC) for Renewed Materials License No. SNM-2505 for the Calvert Cliffs Independent Spent Fuel Storage Installation (ISFSI). The amendment authorizes the following:

- a. Maximum fuel assembly average initial enrichment of 5 weight percent U-235.
- b. Expansion of the ISFSI total capacity from 120 horizontal storage modules (HSMs) to 132 HSMs on the existing site.
- c. A new 32PHB Dry Shielded Canister (DSC) design and a new HSM-HB for use at the CCNPP ISFSI.
- d. Storage of Westinghouse and AREVA Combustion Engineering 14X14 fuel in the NUHOMS®-32PHB Dry Shielded Canister system

Based on our review of your application, as revised and supplemented, the NRC staff has determined that there is reasonable assurance that: (i) the activities authorized by the amended license can be conducted without endangering the health and safety of the public and (ii) these activities will be conducted in compliance with the applicable regulations of 10 CFR Part 72. The staff finds that Amendment Request No. 11 to Renewed Materials License No. SNM 2505 meets the requirements for a categorical exclusion per 10 CFR 51.22(c)(11), and therefore, pursuant to § 51.22(b), an environmental assessment or environmental impact statement is not required.

The NRC has approved the requested amendment. The amended license supersedes in its entirety Renewed Materials License No. SNM-2505, dated October 23, 2014. Changes made to the attached Materials License are indicated by vertical lines in the right margin. A revised TS is also attached, and changes are also indicated by vertical lines in the right margin.

G. Gellrich
