## General Comment

It is clear that the NRC has a duty to protect the people of our country from the threat that nuclear [power & its radioactive waste poses...It is equally clear that rather than putting people and planet FIRST, it has since its inception been a protector of the nuclear power corporations' profits. It is the DUTY of the NRC to not only 'allow' the public and our state and local ELECTED REPRESENTATIVES to exercise power over the way in which the NRC regulates and ENFORCES safety and welfare rules but to abide by the science and expertise of neutral parties and put into law--and UPHOLD THAT LAW--that ensures Entergy & all nuclear corporations decommission Pilgrim and all nuclear power plants SAFELY...with adequate funding for dry cask storage, proper clean-up (if there can ever be that!) and provide for RETRAINING of workers who have risked their lives over the years and will need NEW< SAFE JOBS IN GREEN RENEWABLE ENERGY to replace this nuclear menace. This is the DUTY of the NRC and EVERY INDIVIDUAL MEMBER. WE are writing to demand full hearings, intelligent and quick remediation of this 'nuclear nightmare' and be diligent in your job of PREVENTING ANOTHER CHERNOBYL or FUKUSHIMA from ever happening again. Climate change is real, rising seas is real, Pilgrim MUST BE CLOSED NOW...safely decommissioned, dry cask storage done IMMEDIATELY & PROPERLY, a safe & proper clean-up, and all funding PAID FOR OUT OF THE PROFITS OF ENTERGY & ALL NUCLEAR POWER CORPORATIONS...as is the law. The new requirements working their way to the Massachusetts Statehouse will be a DOUBLE INSURANCE that these BASIC measures are backed by law & ENFORCED BY THE POWER OF THE STATE AND FEDERAL GOVERNMENT. No more games. NRC:DO YOUR JOB...
