General Comment

When nuclear plants are decommissioned, the funds the plant has to do the job are sometimes used as operating expenses and for lobbying. These funds are available only for radiological CLEANUP! The parent corporations must be responsible for any shortfalls in the decommissioning fund. Finally, emergency planning zones should not be made smaller. Insurance coverage should not be reduced. All of this should remain in place until all the spent fuel rods have been removed from their pools and placed in dry cask storage.
