Annual Exempt Distribution Report

March 24, 2015

Attn: Document Control Desk/Exempt Distribution
Director, Office of Nuclear Material Safety and Safeguards
U. S. Nuclear Regulatory Commission
Washington, DC 20555-0001

RE: Annual Exempt Distribution Report

Dear Director:

Enclosed please find our annual report for shipment of devices to users exempt from licensing requirements as per our Exempt Device Registration No. NR-1368-D-101-E and Exempt Distribution License No. 45-23855-01E, and described in 10 CFR 32.29(c).

The total quantity of devices (devices are defined as a set of HALO Series sights. Each set of Halo Series sights consists of a single front sight and a single rear sight) shipped in the calendar year ending 2015 was 9,489 sets. The breakdown for each unit by model number is as follows:

Model: HALO Series

HALO Model No.: NR1 Front Sight

The total activity of radioactive material in this device is 25 mCi per front sight.

Model: HALO Series

HALO Model No.: NR1 Rear Sight

The total activity of radioactive material in this device is 50 mCi per front sight.

We have not, as of this writing distributed radioactive materials that we have licensed to non-exempt users. We are looking to engage this market during the 2016 year but have not done so to date.

If there are any questions please contact me by phone at (757) 821-1089 extension 125 or by email at H.OKAMURA@KRISS-USA.COM.

Sincerely,
