

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D.C. 20555-0001

March 29, 2016

MEMORANDUM TO: Mark L. Banks, Chief  
Technical Support Branch  
Office of the Advisory Committee on Reactor Safety

FROM: Thomas H. Boyce, Chief */RA/*  
Regulatory Guidance and Generic Issues Branch  
Division of Engineering  
Office of Nuclear Regulatory Research

SUBJECT: NOTIFICATION OF RESULTS OF SCREENING ACTIVITIES OF  
RECENT GENERIC ISSUES

In accordance with Management Directive 6.4, "Generic Issues Program," the Generic Issue Program Manager is informing the Advisory Committee on Reactor Safety (ACRS) of the results of recent screening activities and assessments relating to proposed Generic Issues. The following is a list of the Generic Issues which have recently been screened out of the program with a conclusion that no further regulatory actions are required:

- Screening results for proposed generic issue on the potential loss of steam-driven pumps due to dependence on electric power ADAMS Accession No. ML15279A364
- Screening results for proposed generic issue on the effects of downstream dam failures on nuclear power plants ADAMS Accession No. ML15253A403
- Screening results for proposed generic issue the potential explosion of hydrogen in the reactor coolant system (RCS) due to water hammer, ADAMS Accession No. ML15191A405

Please contact the individuals listed below if you have any questions or need additional information in regards to the activities reported above.

CONTACTS: Stanley Gardocki, RES/DE/RGGIB
