Gentlemen,

The attached documentation is being filed as an annual transfer report for use under 10 CFR 30.15(a)(8)(iv) as required by 10 CFR Section 32.16(a)(2).

The attached document includes the quantity of High Pressure type quartz lamps containing Kr-85 sold by Light Sources, Inc. at 37 Robinson Blvd., Orange, CT., 06477 during the reporting period of January 1, 2015 until December 31st, 2015.

Light Sources, Inc. was asked by Eric Reber of the NRC to submit a corrected annual report. Attached is the information on the total number of products sold during 2015 along with the calculations of the radiation activity based on all tolerances in the manufacturing process of the products. The previous report was an estimate of the "Maximum Quantity" of activity in the products. The revision is the calculations of the actual activity level calculated by the manufacturer. The manufacturer confirmed that no changes have been made to the manufacturing process since our initial reports were filed.

Included in the report is the summary of each model type sold by name and description, the quantity of each radionuclide, and the address and name where each product was shipped during the reporting period as previously submitted.

Please contact me if any additional information is necessary.

Sincerely,

Eugene Czako
Light Sources, Inc.
37 Robinson Blvd.
Orange, CT 06477

NM5503

Lamp Body	Outer diameter	Inner diameter with tolerance +/- 0.15	Arc Length with tolerance +/- 1mm	Total Volume	Volume	uCi at 1 atmosphere	Nominal fill pressure with tolerance +/- 5%	uCi/lamp		
Type	[mm]	[mm]	[mm]	[mm ³]	[Liter]	Volume X 50uCi/litre	(mbar)	Nominal Activity	Quantity Sold	Total uCi/lamp model
250W	14	10.8	15	1373.44	0.001373	0.0687	130	0.00893	2927	26.1

2000W	No Kr85 in 2000W								0	0.0
Total Sales 2015									43858	2036.8
Total uCi sold in 2015										

No changes were made in the manufacturing processes of the lamps. All of the activity was recalculated from the previous submission using the actual lamp dimensions and production tolerances. The total radiation activity of all of the lamps sold for 2015 is calculated to be 2,037 microcuries.

The largest possible variable in the calculations is the fill pressure. All other variables are small. Assuming the largest variable of +/- 5% on the fill pressure the actual range of radiation will be:

Maximum 2138 microcuries sold for 2015
Minimum 1934 microcuries sold for 2015

LIGHT SOURCES SALES HISTORY BY MODEL TYPE - TIME PERIOD 01/01/15 TO 12/31/15 - HP LAMPS AS OF 01.29.2016
