**Subject:** [External\_Sender] AMP Termination

Kevin,

Form 314 Certificate of Disposition for termination of our NRC License No. 34-26645-02 was signed on 8/5/15. Only one source in our possession required leak testing at that time and it was a Cs-137 E-vial that contained approximately 115 uCi. This source was last leak tested on 6/21/15 and showed no removable contamination. This and all remaining sources continue to remain under our supervision under our State of Ohio RAM license 03220780001.

All other E-vial type sources in our possession have contained less than 100 uCi for quite some time now. All remaining sources are the small ~1 uCi reference standards used for well counter calibration etc.

I hope this information is acceptable. If additional clarification is needed please contact me.

Frank Bloe, RSO

CC: Barb, plz put on file with NRC correspondence records.
