

Chloride-Induced Stress Corrosion Cracking (CISCC) Regulatory Issue Resolution Protocol (RIRP) Closure Meeting

Mark Lombard
NRC/NMSS/DSFM

NRC/NEI/EPRI Public Meeting
April 28, 2016

Regulatory Issue Resolution Protocol

- Nuclear Energy Institute, NEI 14-14 (NRC ADAMS ML 1433A180)
- A Methodology for Resolving Regulatory Issues with Generic Implications for Fuel Cycle Facilities
- RIRP Phases
 - Identification
 - Screening
 - Planning
 - Implementation
 - Closure

CISCC RIRP

- Initiated in February 2010
- Purpose: Address CISCC as a potential aging mechanism for welded stainless steel canisters
- Participants:
 - Nuclear Energy Institute (NEI)
 - Electrical Power Research Institute (EPRI)
 - Dry storage system vendors
 - NRC licensees
 - NRC staff
 - Public

Public and Industry Meetings

- NRC sponsored public meetings
 - Multiple CISCC RIRP meetings
 - Independent spent fuel storage installation (ISFSI) license renewals
 - Certificate of Compliance (CoC) renewals
 - Regulatory Information Conference (RIC)
 - Division of Spent Fuel Management Regulatory Conference (REG CON)
- Industry sponsored meetings
 - NEI Used Fuel Management Conference
 - EPRI Extended Storage Collaboration Program (ESCP)

NRC Publications

- NUREG/CR-7030, “Atmospheric Stress Corrosion Cracking Susceptibility of Welded and Unwelded 304, 304L, and 316L Austenitic Stainless Steels Commonly Used for Dry Cask Storage Containers Exposed to Marine Environments,” (ML103120081) October 2010.
- NRC Information Notice 2012-20: Potential Chloride-Induced Stress Corrosion Cracking Of Austenitic Stainless Steel and Maintenance Of Dry Cask Storage System Canisters (ML12319A4400) November 14, 2012.
- NUREG/CR-7170, “Assessment of Stress Corrosion Cracking Susceptibility for Austenitic Stainless Steels Exposed to Atmospheric Chloride and Non-Chloride Salts,” (ML14051A417) February 2014.
- NUREG-1927, Rev. 1, “Standard Review Plan for Renewal of Specific Licenses and Certificates of Compliance for Dry Storage of Spent Nuclear Fuel,” Draft Report for Comment (ML15180A011) June 2015.
- NUREG-#TBD Managing Aging Processes in Storage (MAPS) Report (in development).

EPRI, NEI and INPO Products

Electrical Power Research Institute (EPRI)

- Failure Modes and Effects Analysis (FMEA) of Welded Stainless Steel Canisters for Dry Cask Storage Systems, EPRI-3002000815, December 2013.
- Literature Review of Environmental Conditions and Chloride-Induced Degradation Relevant to Stainless Steel Canisters in Dry Cask Storage Systems, EPRI-3002002528, May 2014.
- Flaw Growth and Flaw Tolerance Assessment for Dry Cask Storage Canisters, EPRI-3002002785, October 2014.
- Susceptibility Assessment Criteria for Chloride-Induced Stress Corrosion Cracking (CISCC) of Welded Stainless Steel Canisters for Dry Cask Storage Systems, EPRI-3002005371, September 2015

Nuclear Energy Institute (NEI)

- Format, Content and Implementation Guidance for Dry Cask Storage Operations-Based Aging Management, NEI 14-03 Rev 1, September 2015 (ML15272A332)

Institute of Nuclear Power Operations (INPO)

- Industry Dry Cask Storage OE Database (in development)

RIRP Closure

- Work conducted has led to a significantly improved understanding of the potential for CISCC of welded stainless steel canisters
- Aging Management Programs (AMPs) have been developed to address CISCC
- Operating experience database is key to learning aging management
