Yufna –

The action that we are working on related to Smith Ranch is a review of Cameco's license renewal application. More information on this action can be found at the following link:

<http://www.nrc.gov/materials/uranium-recovery/license-apps/smith-ranch.html>

In the next month or so, you should see a letter from the NRC re-initiating the formal National Historic Preservation Act Section 106 consultation process for the Smith Ranch license renewal review.

I've also passed along your contact information to Jim Park, who will be leading the Section 106 consultation process. Jim is also copied on this email.

Doug

Douglas,  
Hello. I am the director of the Northern Arapaho THPO.  
I would like to request more information regarding the proposed licensing of Smith Ranch Uranium InSitu.

I'd like to request archeological report, inventory any EIS/EA or any type of information to help me evaluate and determine the process in which we will proceed.

Any help would be appreciated!

This is my email and you can reach me at the phone numbers below.

Thank you and have yourself a good day!
