I have lived in Northern Colorado for many years and recreate in the Black Hills. I have a degree in hydrology and plan to start law school this fall. Strata Energy's proposal does not hold water in regard to protecting the land for the enjoyment of future generations. The uranium isn't going anywhere, just like the hundreds of open shafts I have explored in Colorado and Utah still remain littered among public lands. I am involved with utilities-scale solar projects in the Front Range and can say with certainty that nuclear is a bridge fuel just like natural gas is clean. The monied interests can only promulgate their development if our NRC disregards the citizen's voice. I will say loud and clear: This proposal is an insult to me, to the First Nations, and to countless unborn potential humans.

Thank you for your time & may you consider the implications of your decisions.
