**Subject:** [External\_Sender] Uranium' s toxic legacy!

The NRC, owes it to all Americans, to discontinue uranium mining' s toxic legacy by opposing any new mining and cleaning up the decades of radioactive damage in all states that have suffered this!

I know, because I live in one of these states, New Mexico! My state is a nuclear wasteland, just ask the Navajo and acknowledge the suffering of generations of them, the damage to their environment, including, their water sources!!!

The Animas river spill, is only one of countless spills, that, add to the deadly legacies of of past uranium mining!

The companies who mine uranium, are to this very day, untrustworthy! Just look at all of the abandoned uranium mines, not just here in New Mexico, but in South Dakota, Wyoming, etc.! The people who live anywhere near these abandoned mines experience much greater rates of cancers and other major diseases due to elevated radiation!

What is wrong with you, in government positions, that you could allow this to go on?

Please oppose further uranium mining, even your lives depend on doing so!

Please allow your humanity to shine in this opposition, otherwise, you are sentencing us all, to an even worse fate, now and into the future!!!

L. Bagley  
Albuquerque, NM
