To whom It May concern:

- Consider that the proposed mining and processing process has an extremely high consumptive use of water, which has the potential to draw down the aquifers that provide drinking water and water for livestock.
- Consider the track record of spills, excursions, pond leaks, and failed aquifer restoration at previous uranium mines in Wyoming, Nebraska, and Texas. Impacts of past uranium projects have been significant – with routine spills, leaks, and excursions of chemicals into adjacent aquifers. To date, not a single uranium project has fully restored an aquifer to pre-mining water quality. There is no indication that Strata’s operations will prevent these impacts.
- Consider the cumulative impacts to water quality and quantity from the full scope of Strata’s whole project, which includes this first permitted site of the Ross Project with an anticipated four additional projects in the approximately twenty mile area of the “Lance District” in Crook County. Strata should not be allowed to expand until Powder River Basin Resource Council’s appeal for the Ross Project is settled
- Minimize light pollution and other industrial impacts to landowners in the Oshoto area and to Devil’s Tower National Monument.
- Minimize impacts to livestock grazing and recreation in the area.
- Minimize impacts from truck traffic, dust, and noise.

Sincerely,

Kathleen Kimberling
